To Whom It May Concern

Tropical Landscaping International were initially selected due to their extensive golf course green construction experience to perform the installation of nine greens on the mini golf course at an exclusive residential project in Mai Khao, Phuket.

In my role as the Project Manager, and as the Developer and the Landscape Architect demanded the employ of a professional, modern and reliable Landscaping company that could present the landscape year-round to the high standard required of our discerning clients, we extended the scope of works to also include the installation of significant landscaping around the 80 rai property, and signed a Landscape Management Agreement with Tropical Landscaping International to replace the existing landscape maintenance contractor and manage the significant landscaping on the site.

During my years working as a Project Manager in Thailand I have yet to come across a Landscaping company as knowledgeable, well resourced, adaptable and helpful as Tropical Landscaping International. The knowledge base of Tropical Landscaping International has allowed us to proceed with site improvements, such as the turfing of a salt tainted beach front, due to the expertise and knowledge of the species available and adapted to the local environment and the unique climate of the area.

Senior Management of Tropical Landscaping International are always available to trouble-shoot problems or requests as they arise in a punctual and efficient manner. With this accessibility and the fact that Tropical Landscaping International and their management team are based locally in Phuket has been a great reassurance to me personally in my role as the Project Manager. It seems as though Tropical Landscaping International have a real passion for the industry, and treat our project as there own.

I can honestly say that I would not hesitate at all to recommend Tropical Landscaping International for any Landscaping or Golf Course project, be it construction, installation, maintenance or management.

Sincerely,

Mr. Robert Pfingstein

Project Manager
